Support Depression Screening and Follow-Up

California Health & Wellness Plan (CHWP) recommends that providers screen all members annually for depression

CLINICAL RECOMMENDATION

The U.S. Preventive Services Task Force (USPSTF) recommends screening for depression among adolescents ages 12–18 and the general adult population, including pregnant and postpartum women. The USPSTF also recommends that screening be done with adequate systems in place to ensure accurate diagnosis, effective treatment and appropriate follow-up.

QUALITY MEASURES USED TO MONITOR DEPRESSION SCREENING AND FOLLOW-UP

	Depression Screening and Follow-Up (DSF-E)	Screening for Clinical Depression and Follow-Up Plan (CDF)
Measure type	The Healthcare Effectiveness Data and Information Set (HEDIS®) measure used for depression screening	Quality measure stewarded by the Centers for Medicare & Medicaid Services and endorsed by the National Quality Forum (NQF)
Data collection method	Electronic Clinical Data System (ECDS) data collection, which uses the following electronic methods for data collection: electronic health records (EHR), health information exchange (HIE)/clinical registry, case management registry, and administrative claims.	Administrative data collection. Medical record review may be used to validate the state's administrative data (for example, documentation of the name of the standardized depression screening tool used).
Documentation requirements	Does not require an encounter for the screening alone; requires service or encounter for the follow-up if the screening is positive.	Requires an encounter for the screening and follow-up.
Screening tools applicable for both quality measures	 Adolescents (ages 12-17): Patient Health Questionnaire (PHQ-9) - positive finding: Total score ≥ 10 Patient Health Questionnaire Modified for Teens (PQH-9M) - positive finding: Total score ≥ 10 PRIME MD-PHQ-2¹ - positive finding: Total score ≥ 3 Center for Epidemiologic Studies Depression Scale-Revised (CESD-R) - positive finding: Total score ≥ 17 Edinburgh Postnatal Depression Scale (EPDS) - positive finding: Total score ≥ 10 Beck Depression Inventory-Fast Screen (BDI-FS)^{®1,2} - positive finding: Total score ≥ 8 PROMIS Depression - positive finding: Total score 	
	(T Score) ≥ 60	(continued)

QUALITY MEASURES USED TO MONITOR DEPRESSION SCREENING AND FOLLOW-UP (CONTINUED)

Telehealth

For telehealth visits, include modifiers 95 and GT, where applicable. Telehealth place of service may be required and use code 02.

Tips and best practices

- These quality measures are two-part measures, which require documentation of the screening and the follow-up for positive screens.
- Medical record recommendations:
 - Make sure there is documentation of a referral or the need for further evaluation on the encounter date, where applicable.
 - If the screening is positive for depression, ensure there is documented evidence of follow-up care. If screening is positive and there is no follow-up plan, the visit will only count for the screening and not for follow-up care.

PRIMARY CARE PHYSICIAN (PCP) REFERRALS TO BEHAVIORAL HEALTH

- MHN is CHWP's behavioral health subsidiary. Their customer service is open 24/7. Refer to the member's identification (ID) card for the phone number.
- Talk with the patient about behavioral health services the patient may like to receive.
- Refer the patient to MHN if the patient is open to those behavioral health services.
- Patients do not need a referral if they are in active treatment with behavioral health providers and like their provider.
- Patients should be aware of the PCP referral. If patients are not aware, they may not answer or return calls from MHN.
- Please refer patients to MHN if they feel that their current behavioral health treatment is not working, want to change providers or add another service.

PRIMARY CARE PHYSICIAN (PCP) REFERRALS TO BEHAVIORAL HEALTH (CONTINUED)

• When referring members to a behavioral health provider, ensure the member signs CHWP's Authorization for Disclosure of Protected Health Information form. This form authorizes MHN to send information back to you about your patients. This form is needed beyond your practice's own release forms.

MYSTRENGTH

CHWP also offers myStrength. myStrength is a free, dynamic and personalized website that offers clinically-proven mental health applications and tailored wellness resources to help with mental health challenges. If a member is struggling with mental health or simply needs a lift, advise the member to visit www.myStrength.com to access and sign up for the online program. Once members are registered online, they can also use their user name and password to log in to the myStrength mobile app.

EXCLUSIONS

Members can be excluded if they meet any of the following criteria:

- Bipolar disorder during the measurement year or the year prior to the measurement year.
- Depression during the year prior to the measurement year.
- In hospice or using hospice services during the measurement year.
